TGEE SPOOLER 2.0 Bobbin Winder

The TGEE Spooler 2.0 Bobbin winder is winding in 1 cycle - without interference of the operator - maximum 15* Bobbins, where other machines can only wind 1 Bobbin at the time.

You will save a lot of working labour time with the TGEE Spooler 2.0. * *Brother machines have bigger Bobbins, the TGEE Spooler 2.0 can even wind 12 of these Bobbins in 1 cycle.*

The TGEE Spooler 2.0 Bobbin Winder was designed from the needs of the embroidery industry: Winding many bobbins with a minimum of effort in shortest time.

Due to user-friendly design, it is a simple steering combined with a minimum of service time.

The TGEE Spooler 2.0 Bobbin Winder will bring you a fast return on your investment, because your production will run smoothly, less stagnation, saving labour costs and last but not least higher production volumes in the same time.

The Bobbins are winded for example with a yarn cone of 5.000 meters, all the Bobbins are separated automatically from each other and are easy clicked in a fast-clamp system.

A unique system is responsible for winding all kind of Bobbins in despite of the differences in tread thicknesses. After winding the yarn on the Bobbin, it will be cut through fully automatically. You now can use the Bobbins without any extra proceedings for your embroidery machines.

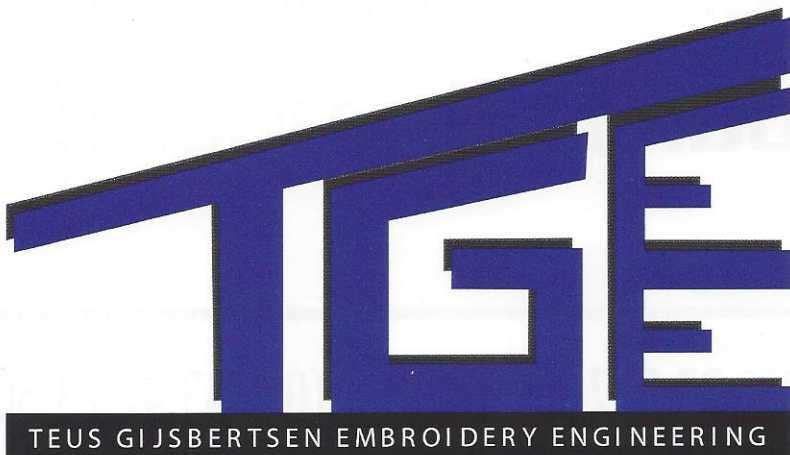

You can wind a lot of Bobbins in advance and put them in your stock, so that you never will have stagnation in your production process, due to a lack of Bobbins.

The TGEE Spooler 2.0 Bobbin Winder is easy to fit in the available operator time and your production can run smoothly and very efficient.

In combination with a very fast earn back time, the TGEE Spooler 2.0 Bobbin Winder will improve your competition position tremendously!

The advantages of the TGEE Spooler 2.0 Bobbin Winder:

- **Enormouse labour time / labour cost savings compared to single electric Bobbin winders**
- **Suitable for multiple industries: Embroidery, Automotive, Sewing, Quilting and much more...**
- **Capacity up to 70 Bobbins per hour, user-friendly everyday**
- **Sustainable device, made in Holland with high-end quality parts**
