Vliseline Cutter

TGEE 2300 3.0

TGEE 1900 3.0

The advantages of the TGEE 2300 3.0 and 1900 3.0 Vliseline Cutting machine:

- Enormous labour time/labour cost saving compared to handwork and no loss/waste of material
- Almost all types of Vliseline can be cut with the new cutting process
- Touchscreen with full control over safety and cutting process
- Complete system for cutting all sizes of vliseline backings and fast ROI

The TGEE Vliseline cutter fully automatically cuts almost all types of Vliseline rolls up to 1500 mm width.

TGEE 1900 3.0 cuts max. 3 rolls up to 1500mm width, ideal for the usual roll lengths of Madeira and Gunold (1050mm width)

TGEE 2300 3.0 cut max. 6 rolls up to 900mm width, 2 different sizes can be set in 1 cycle, like left hand side 200mm x 200mm and right hand side 400mm x400mm at the same time.

We supply our TGEE cutting machines worldwide through our dealer network with practical advice and after-sales service.

You will find our cutting machines on all continents of the world at companies that either have a large production capacity or would like to have an automatic and fast system that perfectly matches their own production system.
